2019 Theme: Girls Have Talent

Girls are achieving remarkable successes in today's world. Even though many hurdles continue to exist for females, they are able to overcome their challenges and soar. They also know how to give to others. Come join other middle school girls in exploring many of the issues they face and discover ways to achieve a sense of self, deal with conflict, build relationship, explore the local community and the global world. We include writing, art projects, movement, sharing and playfulness in learning how to be great. We are celebrating our 21st anniversary this summer.
